Functions

The AM-T01 will send information to a linked smartphone, using the **Track Solid app**, as follows:

• Vehicle location tracking , using GPS and Google Maps with your smartphone.

• Tamper protection, sending a message to your smartphone if the device is disconnected or otherwise tampered with.

• Boundary setting – the geofence function will send a message to your smartphone of the vehicle goes outside a zone that you can easily set using the Tracksolid app.

• Persons in the vehicle can use the AM-T01 SOS button to send an emergency message to up to three linked smartphones.

• Listen-in. You can send an SMS message to your AM-T01, with a command to call the SOS numbers. Users of the SOS numbers can then hear sound from the vicinity of the AM-T01.

Fitting the SIM card

Please purchase a nano SIM card from a network service provider, with SMS and GPRS.

SIM
When the nano SIM card is inserted and the AM-T01 is ON, the LED will light up.

The LED will then flicker four times when the AM-T01 is switched off.

If the SIM card is not successfully installed then the LED will remain off for 3 minutes.

1 **Download the app** from the Apple App Store or Google Play Store. Please search for "Tracksolid" or scan the QR code below using your smartphone.

2 Sign up to **create an account** on your smartphone. You will need to request a verification code. It will be sent to your email address.

Click here to receive your verification code.

3 Then return to the app home page. Enter the IMEI number that can be found on your AM-T01 or on the box. You can either scan the bar code, or enter the number manually. You will then be prompted to **enter your vehicle's details**.

Click here to see a Track Solid **demo**.

The home screen
The arrow shows the **List** icon.
4 On-screen instructions show you how to use the app.

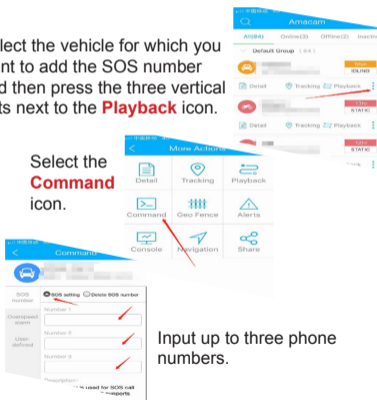

You may also set up SOS text messages to up to three phone numbers.

**1** Press the **List** icon on the app home screen.

2 Select the vehicle for which you want to add the SOS number and then press the three vertical dots next to the **Playback** icon.

3 Select the **Command** icon.

4 Input up to three phone numbers.

Click here to expand the **Track Solid** menu.

Click here to close the menu.

You can also use the following website for additional features:
gps.amatrac.com
Please use the same login details as you used to register the app.

1 Download the Track Solid app. This allows you to register vehicle details, set the geofence (geographical bondary), send 'listen-in' commands, and set SOS numbers,

2 Register your AM-T01 here:
https://www.amacam.net/product-registration
This will activate your app, your website platform subscriptions, your one year's warranty, and online technical support. Please ensure that you enter your IMEI number.

3 You may also use the Amatrac website with additional benefits, at:
